

Niranjan Mahesh Kabade

Full Stack Developer — Angular, React.js, Python, Django Rest Framework & REST APIs

+91-9762764943 — kabadeniranjan27@gmail.com — Pune, Maharashtra, IN

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable SaaS and microservices-based applications using Angular, React.js, and Django. Proven expertise in designing REST APIs, implementing JWT-based authentication, and optimizing backend performance achieving up to 99.9% system uptime.

WORK EXPERIENCE

Swatsan Tech Pvt. Ltd.

January 2025 – February 2026

Junior Full Stack Developer – Python Backend & Angular

Pune, India

- Full-stack Development: Engineered scalable SaaS platforms utilizing Django, Angular, and PostgreSQL, ensuring robust data management and high performance.
- API Backend Architecture: Architected and managed backend systems using Django REST Framework; performed rigorous API testing and schema debugging via Postman.
- UI/UX Enhancement: Designed and implemented new features and pages for the company website, directly improving user engagement metrics.
- Designed Celery + Redis async task execution for concurrent report generation and PostgreSQL query optimization - achieving 99% uptime across all services.

Auspian Technologies

August 2023 – September 2024

Web Developer – React.js & REST API Integration

Kolhapur, India

- Full-Stack Development: Engineered and maintained scalable web applications using React.js for frontend and Java/MySQL for robust backend services.
- UI/UX Optimization: Developed responsive, cross-browser compatible interfaces using HTML, CSS, and JavaScript, ensuring a seamless user experience across devices.
- Systems Architecture: Collaborated on core application architecture and feature implementation with a focus on high-performance optimization.
- Quality Assurance: Ensured application stability by actively debugging, testing, and resolving production issues during the full development lifecycle.

PROJECTS

E-Commerce Engine

Angular, Django REST Framework, PostgreSQL, Redis, Celery, JWT, Tailwind CSS

- Architected a decoupled e-commerce system using Angular for the frontend and multiple Django microservices for Auth, Product, and Order management.
- Integrated Angular Interceptors to manage JWT-based authentication across services and utilized RxJS for real-time state management of the shopping cart.
- Engineered an asynchronous order processing pipeline using Celery and Redis, ensuring 99.9% fault tolerance during high-traffic checkout events.
- Designed a responsive, modular UI with Tailwind CSS and Angular Material, implementing lazy loading to optimize initial page load performance.

SaaS Admin Dashboard – Full Stack Component Library & API Integration Toolkit

React.js, TypeScript, Redux Toolkit, FastAPI, PostgreSQL, REST APIs, Tailwind CSS

- Security Auth: Engineered a robust Role-Based Access Control (RBAC) system using JWT for secure user authentication and authorization.
- State Management: Utilized Redux Toolkit for efficient global state management, ensuring seamless data flow across complex user and subscription modules.
- Scalable UI: Developed a library of reusable UI components (data tables, filters, pagination, and modals) to maintain design consistency and speed up development.
- Performance Optimization: Leveraged lazy loading and code-splitting techniques to reduce initial load times and improve overall application responsiveness.

EDUCATION

SGI, Kolhapur, Maharashtra

B.E. (Computer Science and Engineering)

2017 – 2022

VCK, Kolhapur, Maharashtra

XII

2017

HMEM School, Peth Vadgaon, Maharashtra

X

2015

Languages: Python, JavaScript (ES6+), TypeScript, Java, SQL

Frontend: Angular, React.js (Functional Components, Hooks, Context API), TypeScript, Tailwind CSS, Bootstrap, HTML5, Responsive & Accessible UI

Backend: Django, REST API Design, Python, Celery, WebSockets

Databases: PostgreSQL, MySQL, Redis, Query Optimization, Schema Design

Auth & Security: JWT Authentication, OAuth2 (familiar)

Testing: API Testing (Postman), Unit Testing (basic)

AI & Tools: Gemini, ChatGPT, Claude, Anti Gravity, Git, GitHub

Concepts: Microservices, Event-Driven Architecture, Component-Based Architecture, Agile/Scrum, API Integration
